KEEPING SARA CONNECTED

SARA, Severn Area Rescue Association, is a volunteer lifeboat and inland search and rescue charity with stations along the length of The River Severn. SARA have been saving lives for over 40 years and in 2019 they were called out nearly every three days - their work is vital in keeping people safe.

The opportunity to support a local charity is something that we take great pride in at Graham Smith UK. Rather than making a donation we wanted to help through our expertise and provide a system that SARA could get real value from.

SARA HQ is under The Severn Bridge at Beachley, giving them the fast access to the mouth of The Severn. However, this location did not have sufficient mobile device functionality to keep SARA completely connected and we saw a great opportunity to help.

We fitted an external 4G LTE-A Router, LTE stands for Long Term Evolution and is the fastest type of wireless network for smartphones and mobile devices. Offering higher bandwidth and connection speeds, it is best suited for the demands of modern mobile applications.

With a new external router in place SARA can now be confident that the mobile devices of their teams on site are provided with uninterrupted signal with all the capacity they need at their fingertips.
