# Single Hole Crimp Terminals

## Single Hole Crimp Terminal Features

Our lugs are manufactured from high quality C106 seamless copper tube and are finished with a bright electro tin plate. Our copper tube terminals are designed for use up to 3.3KV.

Available in M4 to M25 for hole size. 3/4", 5/8" spacings for cable up to 120mm. Straight, 45° or 90° available.

Common sizes used by Nokia include M6x16 S-0° and M6x35 S-0°  
Bespoke crimp terminals available on request
